

ANIRUDDHA GHODKE

FRONTEND DEVELOPER (REACTJS)

+918668801353 | [Email](#) | [Portfolio](#) | [LinkedIn](#)

SUMMARY

Over 6 years of experience specializing in designed and developed 3+ high-performance, user-friendly web applications using ReactJS, leading to a 15% improvement in user engagement, Expertise in problem-solving and test-driven development for top code quality. Extensive experience with Agile methodologies and collaboration with designers for UI/UX best practices. Excels in debugging complex issues, optimizing performance, and ensuring accessibility for all users.

TECHNICAL SKILLS

Frontend Development

HTML5, CSS3/Sass, JavaScript (ES6+), ReactJS, NextJS, jQuery

Development Practices

Accessibility (WCAG 2.2), Responsive Design, MVC Architecture

Backend & Platforms

NodeJS, Salesforce

Tools & Methods

Code Debugging, Git Version Control, RESTful APIs

Professional experience

Experience Engg. L2, Publicis Sapient, Pune.

August 2021 - Present

- Engineered modular React components using **Hooks (useState, useEffect, useContext, useMemo, useReducer)** for state management, side effects, and context sharing, enhancing testability and reusability.
- Developed **custom hooks** for form handling, API integration, and error management, reducing code duplication by 40% and accelerating testing.
- Implemented **Context API** for global authentication and role-based access control, improving code scalability and maintainability.
- Integrated **RESTful APIs** with secure token authentication for reliable client-server data exchange.
- Optimized performance via **lazy loading, code splitting, and memoization**, boosting UI responsiveness by 30%.
- Mentored 5 junior developers** in React best practices, code quality standards, and Git workflows.

Full Stack Developer, Climate Connect, Pune.

October 2019 - August 2021

- Developer a multi-user web app for wind turbine audits to analyze health and optimize performance and lifespan of turbines.
- Developed Python scripts to automate web scraping and integrate data into a database for machine learning model execution.
